AI Review Findings:

- **Review Findings:**

- **Taxable Income Calculation**:** The `taxable\_income` field is set to 0.0, which seems incorrect given the income details provided. The `Total Income` is ₹28,104, and there are deductions of ₹30,99,13, which might result in a taxable income. This discrepancy needs to be investigated.
- **Tax Computation**:** The `tax\_computed` field shows a `final\_tax` of ₹0.0, which might be incorrect given the income and deductions. The tax computation needs to be recalculated to ensure accuracy.
- **Refund Information**:** The `refund\_info` field shows a `status` of "pending" and a `balance` of ₹0.0. However, considering the tax computation, there might be a refund due. This needs to be verified.
- **Deductions**:** The `deductions` field shows a `Total Deductions` of ₹30,99,13, which seems high. Upon reviewing the breakdown, it appears that the `section\_24b` deduction is ₹30,79,98, which is more than the `Total Income`. This needs to be corrected.
- **Income Details**:** The `income\_details` field shows a `Taxable Income` of ₹9.0, which seems incorrect given the income and deductions. This needs to be recalculated.
