AI Review Findings:

- **ITR JSON Review Report**

****Review Findings:****

1. ****Missing PAN and Assessment Year****: The taxpayer's PAN and Assessment Year are not provided, which is a mandatory field. This may lead to rejection of the ITR.
2. ****Invalid Income Details****: The income details are not provided in the expected format. The "Total Income" field is a numeric value, but it should be a list of income sources with their respective amounts.
3. ****Missing Deductions Details****: The deductions details are not provided in the expected format. The "Total Deductions" field is a numeric value, but it should be a list of deductions with their respective amounts.
4. ****Invalid Tax Computed Details****: The tax computed details are not provided in the expected format. The "regime" field should be either "old" or "new", but it is set to "new".
5. ****Invalid Refund Info****: The refund info is not provided in the expected format. The "status" field should be either "paid", "pending", or "rejected", but it is set to "pending".
6. ****Invalid Explanation for Selection****: The explanation for selection is not provided in the expected format. The "checks_performed" field should contain a list of checks performed, but it only contains a single key "income_keys".

****Filing Advice:****

1. ****Update PAN and Assessment Year****: Update the taxpayer's PAN and Assessment Year to the correct values.
2. ****Provide Income Details in Expected Format****: Update the income details to include a list of income sources with their respective amounts.
3. ****Provide Deductions Details in Expected Format****: Update the deductions details to include a list of deductions with their respective amounts.
4. ****Update Tax Computed Details****: Update the tax computed details to reflect the correct tax regime (either "old" or "new").
5. ****Update Refund Info****: Update the refund info to reflect the correct status (either "paid", "pending", or "rejected").
6. ****Update Explanation for Selection****: Update the explanation for selection to include a list of checks performed.
