AI Review Findings:

- **ITR JSON Review Report**

Review Findings:

- Taxpayer Information Incomplete:** The taxpayer's name, PAN, and assessment year are not provided. This is a critical piece of information required for tax filing. **Severity: High**
- Income Details Incomplete:** The income details section only contains a single key-value pair for "Total Income". It is recommended to provide detailed income information, including sources and amounts. **Severity: Medium**
- Deductions Information Incomplete:** The deductions section only contains a single key-value pair for "Total Deductions". It is recommended to provide detailed deductions information, including sources and amounts. **Severity: Medium**
- Tax Computed Information Incomplete:** The tax computed section only contains a single key-value pair for "final_tax". It is recommended to provide detailed tax computation information, including tax rates and applicable laws. **Severity: Medium**
- Refund Information Incomplete:** The refund information section only contains a single key-value pair for "balance". It is recommended to provide detailed refund information, including refund amount and status. **Severity: Medium**
- Reason for ITR Selection Incomplete:** The reason for ITR selection is provided, but it is not clear if the taxpayer has performed the necessary checks to ensure eligibility for ITR-1. **Severity: Low**

7. ****AI-Generated Flag****: The AI-generated flag is set to true, but it is not clear if the AI system has been properly trained and validated to generate accurate tax returns. ****Severity: Low****
